Mohd Aahad

Software Developer

Dedicated and efficient Software developer worked with multiple frontend technologies HTML, CSS, JS, and Bootstrap. Also, Python, MySQL, and Django in application layers, presentation layers, and databases. Also, work with AWS cloud for deployment. Seek to further improve HTML5, CSS3, and JS skills as a future **full-stack developer** with a good organization.

PERSONAL PROJECTS

Blog (01/2022 - 04/2022)

• I've built a blog application with Django that allows users to create, edit, like, comment, search and delete posts. The homepage will list all the blog posts, and each individual post will have a dedicated detail page.

Donation (07/2022 - 11/2022)

• I've built a donation application with Django that allows users to make donations.
